SCOPE OF SERVICES:
CONCEPTUAL DESIGN
DESIGN DEVELOPMENT
CONTRACT DOCUMENTS
BIDDING AND PROCUREMENT
CONSTRUCTION MONITORING
PRE-TSA TESTING & CERTIFICATION
PUNCH LISTING AND INSPECTIONS

RELEVANCE:
CHECKED BAGGAGE SCREENING
SYSTEM WITH (2) CT80DR EDS DEVICES.

The Inline BHS for BGR consists of a new ticket counter conveyor subsystem and inline screening consisting of two EDS subsystems. The CBIS consists of two CT-80DR EDS machines that are evenly utilized by the Baggage Handling System. All clear bags are transported to the new outbound make-up area consisting of one flat plate make-up device. Bags that are not automatically cleared at level 1 or level 2 are routed into the separate CBRA area for manual screening/processing.

BNP provided BHS design consultancy services through contract documents, bidding/procurement and full CA services through TSA testing and commissioning.
