BIDDING AND PROCUREMENT  
CONSTRUCTION MONITORING

As part of the consolidation efforts to integrate the operations and facilities of American Airlines and US Airways, American Airlines retained the team of Jacobs Engineering and BNP Associates to modify the existing baggage handling systems. Specifically, we are providing the connection between the Center and North Pier Systems automate both systems, provide transfer baggage capacity, provide additional makeup capability and provide provisions to the future New North Concourse.

The project is currently in the final design stages and construction is expected to begin in late 2018.
