New Terminal 3
Baggage Handling System

Delhi International Airport PVT LTD.

BNP was retained by the Larsen & Toubro Limited to provide baggage handling system consultancy services for the new Terminal at New Delhi International Airport.

The new Terminal 3 at Delhi International Airport is designed to handle 34 million passengers per annum.

Terminal 3 is a mixed mode international and domestic terminal with all departing baggage screened automatically via a 5 stage security system. The system consists of four tilt tray sorters and carousels.

BNP's services included mechanical design review, lower- and upper-level control system design review, general building and services coordination review, punch listing and acceptance testing.
