

MF3 & MU3 Subsystem Overview

MYRTLE BEACH INTERNATIONAL AIRPORT

Myrtle Beach, South Carolina

Terminal Expansion Project

BHS Installation Complete December 2012
 MU 3 Installation Complete August 2019

BNP Associates was the baggage handling system expert for two projects for MYR: Terminal Expansion completed in 2011 and expansion of the Outbound Terminal completed in 2019. The Terminal Expansion Project consisted of an Integrated In-line Checked Baggage Inspection System (CBIS), a make-up area, comprised of two make-up devices, that was part of the outbound BHS and four flat plate claim devices that were part of the inbound BHS.

In 2019, we completed the expansion of the Outbound Terminal by adding an additional make-up device located adjacent to the existing two devices currently located in the bag room. As part of this process, BNP developed MYR's design drawings package, BHS specifications, performed construction administration which included submittal and RFI reviews and BHS commissioning on both projects.

ASSOCIATES, INC.

BNP PROJECT TEAM

Dave Mecartney, Principal
 Calvin Trudeau, Project Director

BHS CONSTRUCTION AMOUNT

US \$10.6 Million

MU EXPANSION AMOUNT

US \$1.6 Million

SCOPE OF SERVICES

- Analysis Study
- Conceptual Design
- Design Development
- Ergonomic Improvements
- Bid Documentation
- Construction Administration
- Testing & Commissioning
